<b>Design Defect Log</b>			
Defect #	Description	Severity	How Corrected
1	Going to a specific /user page allowed users to see all of the users' information	High	UserProfile.js now routes to /user/profile when logging in. Similarly, clicking on "Profile" in the Navbar takes the user there
2	Username above a certain limit can cause overflow on some UI elements	Low	CreateProfile.js now checks length before allowing user profile creation
3	No easy log in button. Can be worked around by visiting User Profile, but button is quicker and easier for user	Low	Added Button to top of the Navbar
4	It is possible for a game to be started with two players of the same color	Low	Add a check when the game is started to make sure that the players are opposite colors
5	Players can move the opponents pieces during their turn	High	Force clientside check to ensure they can only move pieces of their color
