

| Defect Number | Defect Description | Defect Severity (1 being least severe, 5 being most) | Description of test/Test Number |
|---------------|--|--|--|
| 1 | Refreshing on the repo's page causes the site to be redirected to a blank page | 3 | 3 |
| 2 | After login, the dashboard says "User: githubUsername" instead of replacing it with actual username | 1 | 3 |
| 3 | After clicking the link, the site goes to a 404 page, meaning the correct page cannot be found. | 2 | Click the "here" button after it says "for instructions on formatting your repository click" on the user dashboard page. |
| 4 | Upon adding a repository to use with the application, if it is te the website directs to a page which displays an error that says "TypeError: this.state.repos[off_by_one] is undefined" | 5 | 4 |
| 5 | The homepage does not have a "Click create" | 5 | 1 |
| 6 | User cannot enter information to create and use a new account | 5 | 1 |
| 7 | After logging out and going to the home page, pressing log in | 4 | 18 |

| | | | |
|----|---|---|---|
| | allows the user to go back without having to put in credentials again | | |
| 8 | There is no way to logout without deliberately putting http://52.200.13.118:3000/logout into the URL | 2 | There is no logout button on the website. |
| 9 | There is no button for 'tips' | 1 | Tips button is not on the website. |
| 10 | The last repo added cannot | 5 | When adding a repo to format, if you choose the last created repo, the website will redirect to a page displaying an error. |
| 11 | If an error is encountered when adding a repo (an error that redirects to an error page), if you click the back button, the website goes to the login page and not back to the add repo page. | 1 | Add the repo that says "not your repo" to be monitored. After it takes you to an error page, click the back button on your browser and you will see that it goes to the login page. |
| 12 | If you have 2 repos being monitored, and you go and check the test logs of one of them and then click the back button, the other repo will be deleted from being monitored. | 3 | Add 2 repos to be monitored. Click on one of them to check the test logs. Then click the back button on your browser and see that only one of them is being monitored still. |
| 13 | Some repos that are not formatted correctly can still be monitored. | 3 | 5 |

| | | | |
|----|---|---|---|
| 14 | With repos that can be monitored that are not formatted correctly (from defect #13), if you click into one to check the test logs, and then go back, you will see that that repo is changed to the next repo in the list. | 3 | Add a repo to be monitored that is not formatted correctly. Click into it to check its logs. Click the back button on your browser. Notice that the name of the repo being monitored has now changed to the next one in the list. |
| 15 | Repos that are formatted correctly are not always able to be monitored. | 4 | Set up a repo that's formatted correctly and add it to be monitored. Some work and some don't. |
| 16 | Beta tests don't come up in test logs. | 4 | Add a repo to be monitored. Click on it to check it's test logs. Notice the beta tests will not appear. |
| 17 | There's no time interval button to set the github polling time interval. | 2 | There is no button on the website that enables this functionality. |
| 18 | When you click remove repo from being monitored, a message is not shown displaying the result of the operation (product backlog says it should display a message). | 1 | 16 |
| 19 | When an alpha test fails, deployment doesn't stop and logs are not generated. | 4 | 13 |
| 20 | If you login, and press the back button, you are redirected to the login | 1 | Login then press the back button on the browser and you will see that you are back |

| | | | |
|----|--|---|--|
| | page instead of just being kept logged in and redirected to the home page. | | to the login page and must login again. |
| 21 | If you delete a repo from github, the repo list on the website is not updated (the deleted repo still appears in the repo list). | 1 | Delete a repo on github. Go back to the application and notice that the name of the deleted repo is still in the list of repos that you can add to be monitored. |
